Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 January 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 19, 2007 has been entered.

Claims 7 and 21 are pending in the instant application.

Claim 21 has been amended.

Claims 7 and 21 have been examined on the merits.

Response to Arguments

Applicants Amendment and Remarks filed January 19, 2007 have been considered. Rejections and/or objections not reiterated from the previous office action mailed December 16, 2005 are hereby withdrawn. The following rejections and/or objections are either newly applied or are reiterated and are the only rejections and/or objections presently applied to the instant application.

Drawings

The drawings filed on September 14, 2000 are acknowledged. The drawings are objected to because the description of the drawings indicates that such material may very well be critical to determining whether there exists adequate description and

Art Unit: 1635

enablement of the instant invention. In brief, Figure 1, regions P1 and P6, and Figures 2a (photograph) and 2b (photograph) are sufficiently poor enough that it is difficult to determine what is actually being described. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the Examiner, the Applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: Throughout the specification, particularly pages 10, 38, and 39 make reference to "Figure 3a",

Art Unit: 1635

"Figure 3b", and "Figure 4a", where only "Figure 3" and "Figure 4" have been disclosed in the Drawings section of the instant specification. Appropriate correction is required.

Claim Objections

Claims 7 and 21 are objected to because of the following informalities: As written, claims 7 and 21 recite the limitation, "or an oligonucleotide sequence that hybridizes under stringent conditions to a hybridization probe the nucleotide sequence of which comprises the sequence of SEQ ID NO:2 or an oligonucleotide that is complementary or antisense to such a probe". This limitation does not flow very well in the claims and the Examiner is suggesting the insertion of commas after the terms "hybridization probe" and "SEQ ID NO:2". This suggestion or some other form of appropriate correction is required.

Allowable Subject Matter

It is noted that the art does not teach or fairly suggest an allosterically regulatable aptazyme oligonucleotide comprising a Group I intron oligonucleotide and an aptamer oligonucleotide, wherein the kinetic parameters of the Group I intron oligonucleotide vary in response to the interaction of an allosteric effector molecule with the aptamer oligonucleotide and wherein the aptazyme comprises SEQ ID NO:2, or an oligonucleotide sequence that hybridizes under stringent conditions to a hybridization probe, the nucleotide sequence of which comprises SEQ ID NO:2, or an oligonucleotide that is complementary or antisense to such a probe.
